## Dutton Plastics

### A legacy of excellence

Dutton Plastics Engineering (DPE) was founded in 1957 as a company producing dies for metal pressings. Over the years that followed, DPE grew from strength to strength and in 1987 we became part of the Zimco Group of Companies, who are South Africa's leading producer of Industrial and Base minerals, a major producer and supplier of Zinc, Lead, Aluminium and Alloys, related chemicals and engineering plastics.

## Plumbing

Dutton Plastics manufactures a range of high-quality plumbing products that are both locally designed and manufactured. All products undergo a strenuous quality process during the manufacturing and final packaging stage of each product's manufacturing cycle.

## Packaging

Along with supply to the aerosol industry Dutton supplies injection moulded packaging used in the pharmaceutical, mining, personal care and household sectors. Dutton's in-house Toolroom and mould making facilities allows Dutton to assist these industries in designing and manufacturing quality products.

## Research & Development

At DPE, creative work is undertaken systematically to devise new products. In a highly dynamic and fast changing industry, our Research and Development department continually revise and improve our designs and product ranges. DPE remains at the forefront of development in our industry and is committed to meeting the demands of our customers.

# Mission & Vision

Always aim towards being the No.1 plastics injection moulding manufacturer in our chosen markets.

In support of our mission statement, our vision, values and goals Dutton Plastics Engineering is committed to:

An Entrepreneurial drive, Continuous improvement, Innovative spirit, Customer driven service and establishing a value adding relationship with both our customers and suppliers. All this is done to assist with quality enhancement and the introduction of new product opportunities to ensure the achievement of sustained growth.

To continually review the adequacy, sustainability and effectiveness of our policies, procedures, techniques, designs and equipment to ensure that we are able to produce products and services which are competitive, sustainable and in accordance with customers' needs.

Ensure that there is a clear documented understanding of customer and market requirements to ensure that customer expectations are exceeded, while complying with all the National and International standards.

This is a journey we at DPE embark on as a team, objectively striving for:

Continuous  
improvement

Entrepreneurial  
drive

Innovative  
spirit

Customer  
driven service
